Problem Statement

In Courts, lot of evidences are tampered in a way or another due to which innocent lives are sued. When someone submit an evidence to the court (may it be a document, video or audio), the evidence is submitted to police after submission of the same. The parties and the court have to trust all the middle parties

The Solution

Legit Chain

The Solution

Legit Chain is the trustworthy, decentralized way to store evidence, forensic information, and legal records that leaves a major social impact on how people trust the govt officials and making things accessible for them.

Application Flow

uploading case details to ipfs

Signing details user filled using their public key

making the actual transaction from govt account to blockchain

Evidence is posted to the blockchain and can be viewed

verifying the hash so that user doesn't have to pay for the ether
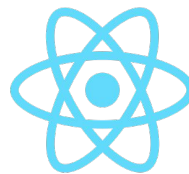

Tech Stack

Solidity

Ganache

Web3JS

Truffle

NuCypher

IPFS

ReactJS
